I would like to share my views on Shree Gugans school. It's an excellent school with an excellent environment. My daughter Naina Jain studied in this school from UKG till grade 10. She experienced a great journey, she achieved a lot in every field, may it be in sports or academics or any activities, through the support of all the teachers. This all may not have been possible without the encouragement and effort of the school and especially the correspondent mam and principal mam of Shree Gugans. They were extremely helpful and friendly towards the students. There was a tremendous amount of care towards the students during the board exams because of which my daughter achieved really good results and got the first rank. The school has strict rules and regulations mainly in the aspects of discipline which makes it a brilliant school and helps your child to have a much better future. Our daughter had an amazing and a beautiful journey in this school.
